❱ Relevant Course Work: Data Structures and Algorithms,Web Technologies,Computer Architecture,Software Methodologies,Problem Solving and Analysis,Information Security,Economics

❱ CGPA 2.4/4.0

❱❱❱ Projects

Awarding System

❱ Built a responsive full-stack web application from scratch which allowed my institution to monitor the awards being offered to graduating students.

❱ This system was to help eliminate the paper system that they use and also remove the need to move be- tween departments during graduation.

❱ This project was built with the framework where i utilized packages like authentication, for html rendering, migrations genera- tor and orange hill/ for generating seeders for the database.

Tech Stack: Laravel,PHP,SQL,Tailwind CSS,Alpine.js

❱❱❱ Accomplishments

❱ 3rd Place in Ghana Technical Universities Sports Association representing my school as the starting shooting guard in the basketball team

❱ 4th Place Regional Literature Competition as a co-poet in the Ashanti Region.

❱ Script Analyst of my High School Literature Group whiles being a science student

❱ Captain of my hall basketball team for two out of my four years in the university winning one freshers games,two inter-halls trophies and two campus league trophies being on the team
